

SINCE 1916

PRODUCT CATALOGUE

Official Authorized Distributor of TSUBAKI Products

Warehouse Stocking
Valued Engineering support
Inspection and after service
Japanese Technology

TSUBACO KTE CO., LTD.

Subsidiary of **TSUBAKIMOTO KOGYO CO., LTD.**

Drive Chains

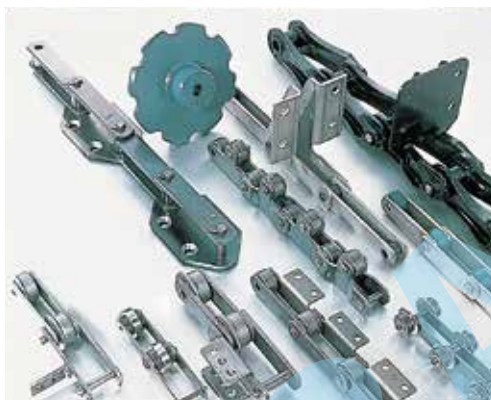

Drive chain that conforms to world standards, such as JIS, ASME, and ISO. We have a very wide range of chain which suit customer needs, application and industries.

Sprockets

Sprockets are gear wheels that transmit shaft rotation to chains or chain rotation to shafts. Types depend on use of a hub: Type A (flat type), Type B (single hub), Type C (dual hub).

Large Size Conveyor Chains

Large size conveyor chain for general use, wear resistant, heavy duty and corrosion resistant.

Small Size Conveyor Chains

Small size conveyor chain for general use, lube free, corrosion resistant and high precision.

Plastic Top Chains

Plastic Top Chain offers an extensive range of features and constructions with a wealth of accessories besides chains.

Cable Carrier Systems

Our cable carrier systems can be found in use worldwide, ranging from standard applications like machine tools, cranes, car-wash systems and medical and laboratory technologies, to more complex applications such as industrial robots, offshore oil rigs and even aerospace.

Timing Belts and Timing Pulleys

Unlike V-belts and flat belts that transmit power through friction alone and suffer slipping, Tsubaki Timing Belts have a tooth profile that engage the pulley to transmit rotation reliably.

Reducers & Gear Motor

Helical Reducer, Worm Reducer, Gear Motor, Hypoid Motor.

Couplings

High torsional stiffness, axial flexibility, dynamic balance is expected from Tsubaki coupling.

Cam Clutches

Efficient, effective for over running, backstopping and indexing specification.

Power Lock

Precision and consistent quality is our power locks feature.

Power Cylinders and Power Jacks

Tsubaki Power Cylinder encompass the used of rotary motion of the motor to converted to linear displacement, it is tough, dependable, controllable and efficient for all your linear needs. Used across a variety of industries by a wide range of customers.

Electrical Overload Protectors

Shock Relay
With the simple wiring system, this current-detecting overload protection device can swiftly detect motor.

Shock Monitor
This motor power-detecting load sensor can detect a subtle load change of your equipment with a simple wiring system.

Mechanical Protectors

We offer a line-up of mechanical protectors such as slipping clutches & brakes suitable for continuous slip, etc., in addition to friction/separate type overload protectors which protect devices during overloads under abnormal conditions.

Conveyors suitable for bulk materials such as cement, chemical products, and fertilizer have wear resistance/durability, and freely convey materials on horizontal + vertical layouts.

Metalworking Chips Handling and Coolant Processing Systems

Chip Conveyor

Mayfran scrap systems incorporate custom designed platforms, stairs, bins, chutes, loose scrap distribution systems and control systems for a complete stamping scrap system unmatched by any other stamping scrap conveyor manufacturer in the world.

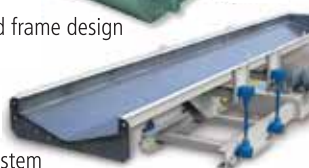

Dimpled Hinged Steel Belting

Open frame design with expanded metal guards

Closed frame design

Shuffle Drive Conveyor System

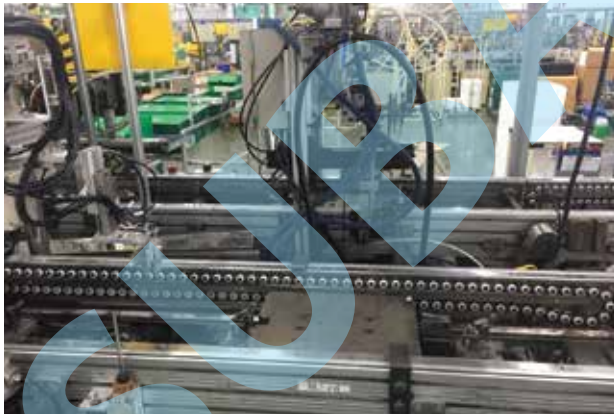

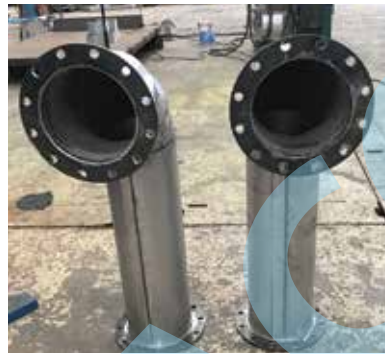

Automated scrap distribution systems specifically designed for customer applications.

Collector conveyors move scrap from the presses discharging it onto conveyors for elevation to distribution systems.

More than 75% of the major stamping plant installations around the world include conveyors manufactured by Mayfran!

<Features>

Compact design / High speed / Multi-point stopping / Longer life / Installation in any direction
Compact design ideal for low height application and saving space.
Conversion from Hydraulic / Pneumatic Mechanisms.

Bangkok Head Office

952 Ramaland Bldg. 17th Floor,
Rama IV Road, Suriyawong, Bangrak, Bangkok 10500 Thailand
